PROFESSIONAL SUMMARY

Full Stack Engineer with 4.5+ years of experience building and modernizing enterprise SaaS platforms. Strong expertise in React, TypeScript, and microservices-based architectures. Led full-scale UI modernization of a 70+ page product and rewrote a core financial calculation engine shared across multiple services handling datasets up to 5,000 shareholders. Experienced in performance optimization, REST API design, AWS cloud services, and stakeholder collaboration.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript

Frontend: React (Class & Hooks), Redux, Context API, Custom State Management, Tailwind CSS

Backend: Node.js, Moleculer, REST APIs

Database: MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda), AWS CDK, Docker, CI/CD

Testing: Jest, E2E Testing, Backend Unit Testing

Performance: Code Splitting, Memoization, Render Optimization, Debouncing

PROFESSIONAL EXPERIENCE

Software Engineer I

Diligent – Bangalore, India

April 2023 – Present

Cap Table Management Software (Enterprise Financial SaaS)

- Led complete UI modernization of 70+ pages and 300+ components from legacy design system to new enterprise design system.
- Implemented environment-based rollout strategy using feature flags to ensure safe production migration.
- Resolved breaking changes across application layers and ensured consistent design adoption.
- Delivered full migration independently within 5–6 months.
- Received stakeholder and user appreciation through Customer Success team feedback.

Core Financial Calculation Engine Rewrite

- Rewrote shared calculation engine used across multiple services handling up to 5,000 shareholders.
- Modularized complex financial logic into pure functions improving maintainability.
- Introduced validation layer to handle null and inconsistent financial inputs.
- Fixed precision and rounding issues affecting large datasets.
- Corrected equity split logic errors caused by order-of-operations flaws.
- Followed test-first approach by writing unit tests prior to implementation.
- Improved accuracy, performance, and reduced production bugs significantly.

Customer Onboarding APIs (Backend – Microservices)

- Designed REST endpoints using Moleculer-based microservices architecture.
- Implemented validation logic and structured error handling middleware.
- Wrote backend unit tests ensuring API reliability.

Diligent Community (Ongoing Modernization – Large Scale Platform)

- Contributing to modernization effort of platform double the scale within 8–10 engineer team.
- Handling modules independently end-to-end.
- Making architectural suggestions and reviewing pull requests.
- Acting as senior contributor guiding team members.

Senior Software Engineer I

SearchingYard – Bhubaneswar, India

July 2021 – April 2023

- Built and maintained full-stack applications using React and Node.js.
- Designed and implemented REST APIs.
- Integrated third-party services to expand product functionality.
- Collaborated with cross-functional teams in agile environment.

EDUCATION

Bachelor of technology

Gandhi Institute of Excellent Technocrats – Bhubaneswar, Odisha

Graduated June 2021

CERTIFICATIONS

AWS Certified Cloud Practitioner

REST API (Intermediate)

Frontend Developer (React)
